Subject: RE: Hard Drive destruction equipment

Simone,

Thank you for providing me with the information I requested. Based on review of the information, I have determined that an air permit for this equipment is not required.

The equipment appears to operate on the vehicle battery and the grinding operation is enclosed.

Please let me know if you have any further questions.

Thanks,

Joanna

Subject: Hard Drive destruction equipment

Joanne,

Thank you for taking my call. I have attached the information spec. sheet supplied by Shred-tech. In addition I have attached their promotional video and a picture of the shredded hard drives and one of the unit on our truck. Please note the shredded hard drives are transported in locked containers and at present no job in Delaware has exceeded 300 hard drives.

Please let me know if you need further information. Have a good week,
